**Nature of Business relationship with Agency:**

IDOE has an agreement with Certiport to purchase Certiport MOS exam site license through Microsoft Volume Licensing Program. The State of Indiana has the option of converting 25% of the 100 purchased site licenses to portable vouchers that can be used at any Certiport Authorized Testing Center. These vouchers will be racked for reporting purposes for students participating in the Microsoft Imagine Academy Program.

**State Why Acceptance is in the Public Interest:**

This event is recommended for curriculum leaders responsible for Computer Science integration in curriculum frameworks and student pathways.

Ms. Irwin works in the College and Technical Education (CTE) Department at DOE. The CTE Team at the Indiana DOE helps connect thousands of Indiana educators and students to engage in professional development through workshops, online communities, and participation in their respective professional and student organizations. Participation in CTE and career pathways not only improves students' technical skills but yields equally impressive academic outcomes. Employability skills, placement after high school, and persistence in pursuing postsecondary education and credentials are all positively impacted. Access to CTE and Pathways for ALL Hoosier students is a priority goal and significant, sustainable progress towards achieving this goal has been made over the last 4 years.

More specifically Ms. Irwin is the contact person when it comes to questions about Indiana Academic Standards for Business, Marketing, Information Technology and Entrepreneurship. This would include all computer science curriculums k-12.
